The following is an examiner's statement of reasons for allowance:

The instant invention claims a tissue product comprising a fibrous substrate having a specific composition and a method to obtain such tissue product.

The closest prior art references that relate to the claimed invention are Zeman'343, Keys'139, Roe'652, '787, '393, Bret'772, '648, Shroeder'412, Klofta'794, '682 Lehrter'580, Ficke'961. The closest prior art teaches that it is known in the art to make and use tissue paper having different compositions including emollients. However, the closest prior art references do not teach or suggest the specific lubrication composition as claimed in the instant invention..
